Premium Water Filtration

The **FE26** iron removal system is an effective, natural way to remove foul odors, rusty iron colored water, and metallic taste from your family's water supply.

We make this unit environmentally friendly by eliminating the use of chemicals and replacement filters. It's virtually maintenance free.

By using compressed air and allowing the incoming water to pass through the air pocket, the iron is oxidized naturally and allowed to be removed by the filter media. It is then backwashed down the drain giving your family clean, iron-free water.

Benefits:

- Clean, Iron Free Water, Naturally
- No Messy Chemicals
- No Replacement Cartridges
- Sediment Filtration Down to 3 Microns
- Removal of Foul Odors Such as Hydrogen Sulfide

System Capacities

1 CuFt

1,000,000 gallons lifetime capacity, for a household of 2 - 4 people. Life expectancy of the media is approximately 10 years.

2 CuFt

1,500,000 gallons lifetime capacity, for a household of 4 - 6 people. Life expectancy of the media is approximately 10 years.

Depends on water usage and water quality conditions. Not intended for microbiologically unsafe or unknown water quality. Disinfection may be required.

***Lifetime Warranty**

System Specifications

3/4" - 1.5" Inlet/Outlet sizes also available by request.

Tank Size	Weight	Height	Width	Depth	Inlet/Outlet
10" X 54"	115lbs	61"	10"	10"	1"
12" X 52"	150lbs	59"	12"	12"	1"

Recommended PSI usage is 80 psi. Intended for residential use only.

**Lifetime warranty excludes medias and consumable parts.*

FE26

Water The Way Nature Intended

The FE26 utilizes the Clack metered control valve efficiently reducing waste water by 30% for reliable pure water.

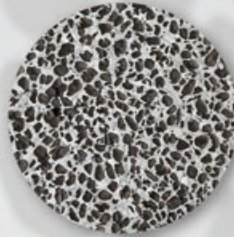

Compressed Air Pocket

As the water passes through the air pocket, iron and sulfur are oxidized and dissolved oxygen is added to the water. The filter media bed then removes iron and sulfur from the water.

Pro Blend - Katalox Light and Filter Ag

A blend of lightweight media that removes iron, lead, manganese, arsenic, hydrogen sulfide, and heavy metals. Filters out up to 3 microns and saves on backwash water.

High Density Garnet Media

High hardness, high density filter media, effectively filters and provides a high quality media bed for this system.

Contaminant Removal

Iron
Lead
Manganese
Arsenic
Hydrogen Sulfide
Heavy Metals

Our complete **Encore** line will give you the cleanest, worry-free, pure water for your entire family. Combine the **FE26** with the **Reveal** water softening system and the **TwistPro** reverse osmosis system to get the ultimate water conditioning for your home.
